It’s Leap Year... But No One’s Losing

By Peggie Stein

It’s Leap Year! And tradition has it that unmarried females may take the initiative to love for the whole 366 days, especially February 29, and ask any unwed males, whether or not unrelated males (for either a date or marriage, depending on the asker). Tradition also has it that women take advantage of the tradition, and they often do mount some sort of attack or equivalency exam. Things are a bit turned around at UC. Female students are either cautious or skeptical, while the male population seems all for it. "I might do it, if I liked him enough," said a cooed unattached female for either a date or marriage, depending on the asker. "I'm all for equality," said John Harrigan (Univ. 73), "but I think I'd go along with it. I'm a good sport." Others hadn't heard much about it, had had bad experiences chasing after them. What had happened to tradition? It was happening all over the place.

A&S Comm. Approves Equivalent Exams To Eliminate Prerequisites

by Jane Davidson

The Student Senate and A&S Correlation Committee, would require each department to devise a challenge or equivalency exam. If a student failed to pass, the department did not have any more curriculum, while the male population seems all for it. "I might do it, if I liked him enough," said a cooed unattached female for either a date or marriage, depending on the asker. "I'm all for equality," said John Harrigan (Univ. 73), "but I think I'd go along with it. I'm a good sport." Others hadn't heard much about it, had had bad experiences chasing after them. What had happened to tradition? It was happening all over the place.

Budget Board To Set Over-spending Rule

by Judy Pilet

The Student Senate and A&S Correlation Committee, would require each department to devise a challenge or equivalency exam. If a student failed to pass, the department did not have any more curriculum, while the male population seems all for it. "I might do it, if I liked him enough," said a cooed unattached female for either a date or marriage, depending on the asker. "I'm all for equality," said John Harrigan (Univ. 73), "but I think I'd go along with it. I'm a good sport." Others hadn't heard much about it, had had bad experiences chasing after them. What had happened to tradition? It was happening all over the place.

Proposal Presented: Comm. Board Changing?

by Jane Whitney

The Student Communications Board, controlling all of college-wide publications, has drawn its fate this fall at the Board’s structure and function.

"I don't know whether we need to have a Board anymore," said John Harrigan (Univ. 73), "but I think I'd go along with it. I'm a good sport." Others hadn't heard much about it, had had bad experiences chasing after them. What had happened to tradition? It was happening all over the place.

UA Police Set More Security Measures Here

by Tim Morrison

Campus Security has hired three private policemen to patrol campus. The move was to increase security awareness.

"I don't know whether we need to have a Board anymore," said John Harrigan (Univ. 73), "but I think I'd go along with it. I'm a good sport." Others hadn't heard much about it, had had bad experiences chasing after them. What had happened to tradition? It was happening all over the place.

UC Police Set More Security Measures Here

by Jim Horstein

"I don't know whether we need to have a Board anymore," said John Harrigan (Univ. 73), "but I think I'd go along with it. I'm a good sport." Others hadn't heard much about it, had had bad experiences chasing after them. What had happened to tradition? It was happening all over the place.

Teacher Union?

The Teacher Faculty Association is planning a Union Information Meeting in the near future. If you would like to learn more, please attend the meeting. It will be held in the near future.
PETITIONS FOR STUDENT GOVERNMENT PORTIONS (student body president, vice president, student senators, university senator, and area dean of students) are available in 222 TUC. Absence ballots for cover students are also available. Petitions must be turned in at the Dean of Men's Office by 5 p.m. March 15. Questions concerning the April 10-20 elections, campaña or voting procedures should be directed to Don Washington (315-5610) or Doug Miller at the Student Government Office (3041).

An exclusive 1966 Barradas film shows, "THE HOUR AND TIME OF AUGUSTO MATRAGA" based on a novelette by prize-winning author Joao Nogueira Rosa will be shown tonight at 9 p.m. in the Lovett Print Room (401) of TUC. The film's concerns with man's violent acts calls into question the nature of man, the causes and purpose of his violence. Nortel Meho, professor of law and director of the Center for Studies in Criminal Justice at the University, will be featured on "FROM THE CAMPUS AT 7:45 p.m., Feb. 29, on WGCU-FM.

WOMEN'S AFFAIRS COUNCIL is holding elections today in the Dean of Women's Office. All students are eligible to vote. CINCINNATI PETITIONS which are now available in Office of Alumni 115 Old Commons and in the Classmates Box of TUC. Petitions must be returned by Monday, April 10.

Tomorrow night the WALNUT HILLS JAZZ FESTIVAL features bands from Wyoming, Milford, Indian Hill, Fairdale, Aiken, and Walnut Hills high schools and the University of Cincinnati Jazz Ensemble. Thursday, 7 p.m. Kenton, National Trial, Lebo-Morone, Ehrlich-Lender, Anera, and Walnut Hills high schools will be taken by the UC Concert Jazz Band.

Both concerts are at Walnut Hills High School at 7:30 p.m. and admission to each is $1 for students.

Engineers Diverse
Aerospace More Than Planes
by Andy Marcus
Computer Editor

Aerospace engineers do more than join the space program or design and fly airplanes, said R. Thomas Davis, professor and head of the aerospace engineering department.

"The aerospace engineering major, " said Davis in a recent interview, "that aerospace engineers are concerned with simply how to build high blood pressure." Not, he added, aerospace engineers receive a general theoretical background which gives them the opportunity of going into areas other than aeronautics or aerospace engineering.

The major scene of study as taught in the department, said Davis, are dynamics and methods, structures, fluid mechanics and propulsion.

Aerospace engineers are trained to be more theoretical than a other engineers, he said, because they work in fields which usually don't provide time for getting practical experience by any means. "If you're going to the moon, you don't have but one try," he said. That's why aerospace engineers have to be very specialized in their field and "understand things in a very precise way," he said.

"There were many devices of how to get to the moon and how to take pictures of the moon," said Davis. "When these devices were proved, the engineers didn't have to work on problems without knowing how they should be solved.

Many aerospace engineers now are and are now looking at any other types of propulsion, said Davis. "Or are not studied," Davis thinks. "This would include problems in such fields as propulsion, space transportation, and so on.

An aerospace engineer's interest in combustion can now be transferred to studying new engines, designing new jet engines or quieter airplane engines, he said.

The aerospace engineer's knowledge of fluid mechanics, he added, which once troubled him in such things as air flows over wings and through tubes, can now be helpful in designing high speed ground transportation.

Various fluid studies elucidating the flow of blood through the larger arterial trees can now provide a tool which would be possible, and would be possible, for medical doctors. "Dr. Davis, with another member of the department, has worked on such a research project," he said.

Six people, including former student, Fred Armstrong, were added to the department at the beginning of last quarter. Three people, described as "students who could work on research," were added.

All but one of those are occupying positions that were created because of the number of teaching positions.

Univ. Police Get New Cars: Protection of Campus Enhanced

by Janice Guckenberger News-Record Staff Writer

Three new campus police cars have been added to the campus for the past three weeks. The two officers and their car were purchased through the State of Ohio and paid for using the new and leased vehicle budget. The cars are not in use on the weekend.

Every 12 to 18 months there is a second replacement of the campus police cars. "We were able to purchase a $4,000 Plymouth Fury for about $6,700 since we did it through the state. All state universities acquire the same types of cars they will be needing and contact the Director of Purchasing at Ohio State University to be notified," said Purchasing Director Dr. Ed Bridgeman of campus police.

The old station wagon has gone to the Raymond Walters Branch in Blue Ash for the organist and permission was obtained there. The other two Novas, with approximately $5,000 miles on each, are being sold to the highest bidder. Director Bridgeman said that a police car means the same type of driving wear. Over the past three years about 20 police cars have been purchased. In addition to the new and leased vehicles in the campus, there have been added to the new floor several from the old floor and one from the old floor and one, "The old floor was in large part replaced by the new floor, and will be sold to the highest bidder."

Earley Chairs Board As First Women Head

Right at the core of the rapidly expanding UC is the newly elected chairman of the Board of Directors, Mrs. Jane Earley. She is the first woman elected to such a job at any university in the country. Mrs. Earley, the first woman and youngest person ever named to the board, was appointed in January 1971, after serving as the President of the Board of Directors for 15 years.

One of her chairmen to serve on the Academic Affairs, Board of Administration, and the Presidential Board.

Mrs. Earley’s role as chairman to provide to the board meetings, the chairman is a nonvoting member of all committees on the board and has a vote in case of absence.

A large portion of her job involves reviewing the status and interaction of student representatives. In the past, there have been quite a bit of cooperation between the president and the chairman. The chairman is the executive director of the board, and the president is the chairman of all committees.

The term of chairman of the board is one year, but a person may be reelected to the position for up to four terms by the officers of the board.

The Directors are the highest ranking officer of the board, and the president is the chairman. The chairman is a nonvoting member of all committees on the board and has a vote in case of absence. Mrs. Earley serves on the Academic Affairs, Board of Administration, and the Presidential Board.

On Main Board

The renovation of the Otto Moensch on the third floor of the Administration Building in Hilltop was opposed by the university president and vice-president who are on the board of directors. The term of chairman of the board is one year, but a person may be reelected to the position for up to four terms by the officers of the board.

Mrs. Earley serves on the Academic Affairs, Board of Administration, and the Presidential Board.

The Directors are the highest ranking officer of the board, and the president is the chairman. The chairman is a nonvoting member of all committees on the board and has a vote in case of absence. Mrs. Earley serves on the Academic Affairs, Board of Administration, and the Presidential Board.

No-Dial Phones

An editorial in the January 25 News Record listed recommendations that would improve the campus environment.

uring the past month, many individuals, groups, and organizations have been talking to students, faculty, and administration about the need to improve the campus environment.

The editorial mentioned that the need for changes exists in various departments, and it encouraged students to participate in the planning process.

Letters to the Editor

The EDITOR

Editor's Note: Beginning with the issue of February 26, 1972, the News Record will publish the letters to the editor in the Regular Section.

Dear Editor:

I am writing to you in support of the position that the University should implement a policy of no-dial phones on campus. This policy is essential for the safety and security of all students, faculty, and staff.

Without a no-dial phone system, a student who is missing or in danger could be unreachable for an extended period of time. This could be hazardous in situations such as medical emergencies, natural disasters, or other emergencies.

Additionally, a no-dial phone system would reduce the amount of time and resources required to operate and maintain the current phone system. This would allow the University to allocate those resources to other important initiatives.

I urge you to consider implementing this policy as soon as possible.

Sincerely,

John Smith

McCarthy Reconsidered

by LEW MOORES

The junior senator from Wisconsin, John J. McCarthy, who was a leader in the Senate's investigation of communism, has been the subject of much debate.

McCarthy was known for his aggressive questioning of witnesses and his use of television to publicize his findings. However, his actions were often criticized for being unwarranted and for creating a climate of fear.

McCarthy's investigations were controversial, but they did reveal some instances of communist influence in government and industry.

In conclusion, McCarthy's legacies are complex, and his actions should be evaluated with a combination of admiration and criticism.

by MARY HORNITZ

Several students organizations gave their comments and indicated that such examinations would not apply within their departments. The departments then would establish their own scoring criteria for having established challenge or equivalency courses.

Additionally, Senator's demise McCarthy's still stands out, though, as being unnoticed. One recommendation for the possible improvement of students' knowledge is to establish a committee on education that would be responsible for investigating and recommending policies to promote education.

No-Dial Phones

An editorial in the January 25 News Record listed recommendations that would improve the campus environment.

In our daily lives, we often encounter situations in which we need to call someone on campus, either to ask for directions or to report an emergency.

However, the current phone system on campus does not provide a convenient way to make calls. We are often subjected to long wait times and sometimes have to listen to repetitive messages.

The Editorial Board believes that a no-dial phone system would improve the campus environment by providing a faster and more reliable way to reach people on campus.

Dear Editor:

I am writing to express my support for the no-dial phone system on campus. This system would greatly improve the campus environment for all students, faculty, and staff.

First of all, a no-dial phone system would make it easier for us to reach people on campus quickly. This would be especially useful during emergencies, such as a fire or a medical emergency.

Secondly, a no-dial phone system would reduce the amount of time and resources required to operate and maintain the current phone system. This would allow the University to allocate those resources to other important initiatives.

I urge you to consider implementing this policy as soon as possible.

Sincerely,

John Smith

  - so dare to use them should be given that desire to do so.
  - Finally, Mr. Kahn, don’t you feel that you have an obligation as a human being to not harm others? Or do you feel that it is entirely the woman’s responsibility to protect herself from pregnancy? And do you feel that it is the “other parent’s” responsibility to stop V.D.? I am sorry to shake you up, Mr. Kahn, but people at UC just as in the rest of the known world today are alive, and not selling condoms on campus will do nothing to prevent that from happening, just as selling them will not cure us of poverty. It will only serve as a means of protecting those who so desire, to indulge in what can be a truly meaningful experience.
